

Breezair Icon[®] Supercool[™] EXS 220

Centrifugal fan evaporative cooler Now available with Black Opal™ MINI-CELL^ Chillcel™ Pads and Wi-Fi Smart App

Permatuf[™] corrosion-proof cabinet

The Breezair cabinet will not corrode or rust. The UV stabilised structural polymer material is the same type used to make acid baths, battery cases and some space satellite components.

Centrifugal fan

Centrifugal fans are the first choice of air conditioning engineers worldwide. The Breezair forward curved, centrifugal fans are made from injectionmolded polypropylene. They are doublewidth, with aerofoil blades to provide high pressure performance and very low noise

MaglQcool™ Controller (standard)

Operate one cooler from an easy to use, wall mounted thermostat controller. The controller comes with 20 m wiring loom that can be extended up to a maximum length of 100 m.

Advanced touch screen MagIQtouch™ Controller

The technology includes in-built Installation Wizard, making the operating process simple. Coolers are supplied with a standard 20 m cable (40 m cable can be supplied as optional) to operate up to 60 coolers from a single MagIQtouch™

NEW!!

Black Opal™ MINI-CELL[^] Chillcel[™] Pads Our revolutionary Black Opal

Mini-Cell Chillcel pads have transformed the aesthetics of our coolers as they seamlessly blend into their surroundings; maintaining our global leading Mini-cell Chillcel pad technology, which increases surface area of the pads by 25%, dramatically multiplying cooling capacity and efficiency - BEYOND BELIEF!

Patent pending

MagIQtouch™ BMS Control interface (optional)

BMS interface as optional with analogue and digital inputs.

NEW!!

MagIQtouch™ Wi-Fi Smart App (optional)

Now you can control your Breezair evaporative cooler remotely using your smart devices

- View the live status of your
- Turn the system on/off or in free-cooling mode
- Adjust temperatures and fan
- Override the Program Modes

HushPower® direct drive (ECM) motor

Exclusive to Breezair, this motor is super efficient and electronically controlled for optimum efficiency. Corrosion resistant, it's the quietest motor available and has unsurpassed reliability. reduced energy use and runs at variable speeds.

Non-clogging water distribution system

Breezair's non-clogging water distribution is one of the things that make it unique. The water distributor maximises cooling efficiency by supplying a continuous and balanced flow of water across the cooling pads. This is different to any other brand of evaporative coolers, which are subject to water flow variations for a

number of reasons. Breezair's balanced flow ensures highest evaporation efficiency and maximum cooling.

Tornado® water pump

Designed, manufactured and tested by Seeley International, the Tornado pump epitomises reliability.

Clean and dry function

The cooler drains automatically when it's not in use, preventing algae growth and maintaining a clean cooler.

WATERManager[™] system

The Breezair WATERManager ensures optimum machine life with minimum maintenance by constantly checking water quality. It senses water quality with a probe that sends a signal back to the electronic module, which then ejects some dirty water and allows fresh water to enter.

AUTOWeatherseal™

The AUTOWeatherseal closes the cooler air discharge outlet automatically, thus significantly reducing natural air currents from circulating in and out of the building.

External Air Sensor

Displays current outside

Intuitively optimises water and energy usage based on outside ambient conditions.

Extends the life of your air conditioner by automatically draining the water tank when temperature nears freezing.
